Multimatic® 220 AC/DC Features and Benefits

All in One

Take on more projects with one machine that has MIG, AC/DC TIG, and DC stick.

MIG: 24 ga.–3/8 in. steel
18 ga.–3/8 in. aluminum

AC/DC TIG: 24 ga.–1/4 in. steel and aluminum

DC stick: 16 ga.–3/8 in. steel

The Multimatic 220 AC/DC comes equipped with all accessories to weld any process, unlike other machines where you need to purchase additional accessories.

Easy to Use

With our innovative QuickTech™ technology, setup and changing processes is even easier.

- Automatically determines the polarity. Work is always connected to the bottom right receptacle. MIG gun and TIG torch can stay connected at the same time.

- Automatically switches to the right process. Just hit the trigger or the foot control and the machine automatically changes, eliminating the need to manually change processes.
- Automatically recalls the settings from the last process used.

Pro-Set™ (TIG and stick manual modes)

eliminates the guesswork when setting weld parameters. Simply adjust control until Pro-Set appears on the display and the number turns blue.

- AC Balance (AC TIG) — controls the cleaning action (Pro-Set 75%)
- AC Frequency (AC TIG) — controls the width of the arc cone (Pro-Set 120 Hz)
- Pulse (DC TIG) — helps focus the arc for increased stability, penetration and travel speed (Pro-Set 100 Hz)
- DIG (Stick) — lets you tailor arc characteristics for a wide range of applications (Pro-Set 30% 7018 electrodes)

Auto-Set™ Elite fast and easy predefined settings for multiple materials and processes to help you get welding quickly.

- Available for all processes (MIG, AC/DC TIG, DC stick) with the ability to fine-tune your settings.

- Set weld parameters by selecting:
MIG (shown) – wire diameter and material thickness
AC/DC TIG – tungsten diameter and material thickness
DC stick – electrode type, diameter and material thickness

MDX™-100 MIG gun with AccuLock™ MDX

consumable system features a dual-locked, front-loading liner that optimizes wire feedability.

- Install AccuLock contact tips with a single turn.
- AccuLock liner locks at front and back of gun to align with contact tip and power pin for a flawless wire feed path.
- Durable, ergonomic handle with overmolding improves grip and comfort.
- Ball-and-socket handle with rear swivel for increased gun maneuverability while reducing welder fatigue.

Robust, angled wire drive with Quick Select™ drive roll for easily changing one wire type/diameter to another. Quick Select drive roll offers three grooves — two for different size solid wires and a third for flux-cored wire.

Two shielding gas connections so both gases can be left connected to the machine, no switching needed. One connection for MIG gas and one for TIG gas.

Easy-to-understand interface with 3.5-inch color LCD display and intuitive connection setup images.

Multimatic® 220 AC/DC Features and Benefits

Portable

Weighing only 56 pounds, the Multimatic 220 AC/DC can go where the work is, plus the added convenience of one machine versus two or more.

Optional dual cylinder rack cart

Dual cylinder rack cart offers portability while holding two gas cylinders.
